

PRESS RELEASE

February 20th, 2019

Cyberus Labs returns to Mobile World Congress in Barcelona to unveil new IoT cybersecurity solution

Cyberus Labs returns to the Mobile World Congress (MWC) in Barcelona on Monday 25th February, two years after successfully debuting its unique password-free user authentication **Cyberus Key**, to reveal its brand new IoT cybersecurity solution - **ELIoT PRO**.

Following the success at the conference in 2017, **Cyberus Labs** last year secured EUR 2M in co-funding from the European Commission's Horizon 2020 SME Instrument to develop **ELIoT PRO** - the end-to-end cybersecurity solution for IoT networks, which eliminates the risk of stolen credentials to protect users, IoT devices and data.

This year, **Cyberus Labs** will be at the centre of 4YFN (4 Years From Now) - the innovation platform at MWC Barcelona - introducing **ELIoT PRO** for the first time and demonstrating an updated version of **CYBERUS KEY** that adds multi-factor authentication and geolocation as additional security layers.

With the global cost of cybercrime set to reach \$2 trillion this year, one of the major themes of the conference is 'Trust & Identity'. From traditional sectors who have fully embraced the digital age like banking and e-commerce to the fast-growing world of IoT, almost every sector is under threat from hacking attacks in the form of phishing, identity and data theft, and much more.

Our IoT solution, **ELIoT PRO** is the most complete end-to-end protection against IoT cybersecurity threats including DDoS, cloning, Man-in-the-Middle attacks, and more. By combining secure Human to Machine (H2M), and Machine to Machine (M2M) authentication and communication with Cybpher – our Lightweight Encryption algorithm - it makes IoT networks safer than ever.

George Slawek, CEO, Cyberus Labs, said *"Cybercrime is a key theme of the conference this year, and rightly so - it's a major threat to the mobile industry. We're proud to be bringing*

our cybersecurity solutions Cyberus Key and now, for the first time, ELIoT Pro, to the world's largest mobile conference.

Our products eliminate the risk of stolen credentials, one of the biggest cybersecurity threats, and we're looking forward to welcoming delegates to our stall to show how we can help protect their system with our simple-to-use, secure solutions"

Visit our Cyberus Labs stall at the Startup Arena, Booth H.2 to meet George Slawek (CEO) and Jack Wolosewicz (CTO), who will be demonstrating CYBERUS KEY and ELIoT PRO on Monday 25th, Tuesday 26th and Wednesday 27th February.

NOTES TO EDITORS:

About Cyberus Labs

Based in Poland, with proven Silicon Valley experience, we're a team of cybersecurity specialists that fully understand the new cyber threats faced by your business or organisation, whatever your size.

From traditional sectors who have fully embraced the digital age like banking and e-commerce to the fast-growing world of IoT, your consumers are under threat from hacking attacks in the form of phishing, identity and data theft, and much more.

Put simply, we eliminate the risk of stolen passwords or credentials for both your users and devices - with our unique password-free authentication using one-time transaction codes. And that makes your users, data and devices more secure than ever before.

About MWC Barcelona

MWC Barcelona (formerly Mobile World Congress) is the largest mobile event in the world, bringing together the latest innovations and leading-edge technology from more than 2,400 leading companies, with a highly-rated conference programme assembling today's visionaries to explore the hottest topics influencing the industry.

The event also features extensive learning opportunities from dozens of partner-led programmes, GSMA seminars, summits and more. Everything you need to know about the industry, today and beyond, can be found here.

With over 107,000 key decision-makers expected to attend, #MWC19 promises to expand your professional network and help you achieve your goals.

About 4YFN

4YFN (4 Years From Now) is the innovation platform of MWC Barcelona, enabling startups, investors, corporations and public institutions to discover, create and launch new ventures together.

4YFN offers unique connecting initiatives including insightful onstage talks, technical workshops, custom networking activities, community outreach and open innovation programmes, among others.

About Horizon 2020 SME Instrument

Horizon 2020 funds high-potential innovation developed by SMEs through the SME instrument. The SME instrument offers Europe's brightest and boldest entrepreneurs the chance to step forward and request funding for breakthrough ideas with the potential to create entirely new markets or revolutionise existing ones.
